COPENHAGEN MALMÖ PORT

CMP, October 31st, 2026

Letter accompanying the pricelist valid from January 1, 2027

Dear Customers,

As we approach January 1, 2027, we would like to inform you about the upcoming adjustments to CMP's prices and share an update on key developments across our facilities in Copenhagen, Malmö, and Visby.

Economic context and pricing adjustments

Throughout 2026, inflation, increased wage levels, rising operating costs, and continued investment in infrastructure, emission reductions and technology have impacted our cost base. In addition, higher fuel costs, including significant increases in the price of fossil-free HVO oil used in our operations, have added further pressure on operating expenses. In light of this CMP will adjust tariffs and terms for 2027 as follows:

- **Dues and service charges** will generally increase by **2 % to 3 %**, Specific adjustments may exceed this range where operational needs or external factors apply.
- **Oil Surcharge** will continue as a temporary fuel-related surcharge as a response to the significant high price of HVO oil.
- **General credit terms** remain at 14 days.

Key developments and investments for the future

CMP's strategic investments continue to strengthen our infrastructure, resilience, and sustainability. These initiatives provide the foundation for long-term growth. Through the development of modern infrastructure and logistics capabilities, CMP further reinforces its position as a key logistics hub for regional and global trade.

- **Relocation of CMP's container terminal in Copenhagen:** CMP's new container terminal in Copenhagen will be fully operational from Q1 2027. The new terminal will enhance efficiency, capacity, and energy performance for our customers.
- **Security and Safety:** As operator of critical infrastructure in Denmark and Sweden. CMP has the responsibility to continuously strengthen security, safety, and resilience across our port facilities.
- **Infrastructure modernisation:** CMP continues invest to invest in the modernization of its port and terminal operations alongside improvements to railway infrastructure in Malmö, to the benefit of our customers and partners.

For questions regarding the updated price list, please contact CommercialTeam@cmport.com. Thank you for your continued partnership and trust. We look forward to working together in 2027 and beyond.

Sincerely,

Povl Dolleris Røjkjær Ungar
