Preface

Welcome to CMP and the Port of Malmö!

When calling upon us, it is possible to dispose of waste generated onboard since the last port of call. In this manual, you can find which types of waste you can dispose of and where. This is done under no special fee. To ensure that we can receive your waste we need a 24-hour notice. All notices are made to havnekontor@cmport.com and the paper form <http://www.cmport.com/port-info/rules-and-regulations> on our website is to be used.

For a view of where the waste collection points are located, please see the map on our website.

If you have any questions or comments regarding waste issues, please feel free to contact the Maritime services by sending an e-mail to havnekontor@cmport.com.

Thank you for helping us achieve a cleaner environment.

Johan Röstin
CEO, CMP

TABLE OF CONTENTS

	MATERIAL	VERSION
1.	General waste	1-2016
1.1	Combustible Waste	1-2016
1.2	Glass, Coloured	1-2016
1.3	Glass, Uncoloured	1-2016
1.4	Hard and Soft Plastic Packaging Material	1-2016
1.5	Mixed Scrap Metal	1-2016
1.6	Paper, Corrugated	1-2016
1.7	Paper, Office	1-2016
1.8	Paper Packaging Material	1-2016
2	Hazardous waste	1-2016
2.1	Absorbents & Oily solids	1-2016
2.2	Aerosols (Spraycans)	1-2016
2.3	Electronics Waste	1-2016
2.4	Fluorescent Tubes	1-2016
2.5	Fireworks, Warningflares And Distress Signal Rockets	1-2016
2.6	Lead-Acid Batteries	1-2016
2.7	Light Bulbs >60 CM	1-2016
2.8	Other Chemicals	1-2016
2.9	Paint Waste	1-2016
2.10	Pharmaceuticals	1-2016
2.11	Small batteries	1-2016
2.12	Waste Oil	1-2016

1.1 COMBUSTIBLE WASTE

Combustible waste constitutes fuel for the production of energy.

😊 YES PLEASE

Textiles
Rubber waste
Wiping cloths, non-absorbent
Work gloves
Plastic coffee mugs
Soiled corrugated cardboard
Soiled plastic
Snuff cans
Wood
Paper towels
Wax paper, plasticised paper
Envelopes

☹️ NO THANKS

Objects >75 cm
Chemical waste
Paint cans with contents
Metals
Concrete and bricks
Plasterboard
Porcelain coffee mugs

1.2 GLASS COLOURED

All types of coloured glass containers. Recycled as new containers and insulation.

😊 YES PLEASE

☹️ NO THANKS

Coloured glass bottles

Coloured glass jars

Window glass

Mirror glass

Crushed glass

Automotive glass

1.3 GLASS UNCOLOURED

Recycled as container glass or insulation.

😊 YES PLEASE

Uncoloured glass bottles

Uncoloured glass jars

☹️ NO THANKS

Window glass

Mirror glass

Crushed glass

Ceramics/porcelain

Laminated glass

Mirror glass

Art glass

Automotive glass

1.4 HARD AND SOFT PLASTIC PACKAGING

Plastic package materials are placed directly in the designated recycling container. The container is emptied and the materials are recycled via Stena Recycling's system. The materials are thereafter incinerated.

☺ YES PLEASE

Buckets
Plastic jugs
Drums
Jars
Bobbins
Plastic barrels
Bottles
Boxes
Plastic tape
Plastic bags

☹ NO THANKS

Plastic mugs
Styrofoam
Protective plastic for piston rods
Packaging that contains waste

1.5 MIXED SCRAP METAL

Mixed scrap metal is inspected, sorted and processed to fulfil the requirements of the steel mills and foundries for quality and purchasing. The scrap metal is thereafter melted down and becomes a new raw material for industry.

😊 YES PLEASE

Diverse scrap metal
Complex scrap metal
Packaging metal
Steel straps
Sheet metal barrels, certified as empty

☹️ NO THANKS

Grindings
Hazardous waste
Oil filters
Combustible waste
Electrical waste
Landfill materials

1.6 PAPER CORRUGATED

Corrugated cardboard has a wavy intermediate layer. Corrugated cardboard is checked, sorted and baled at a paper recycling facility. Thereafter the bales are transported to mills for the production of new corrugated cardboard.

😊 YES PLEASE

Corrugated cardboard
Corrugated cardboard
packaging

☹️ NO THANKS

Corrugated cardboard
packaging contains waste from
groceries, paints, oils or
other contaminants.

Wax-coated corrugated
cardboard

Plasticised corrugated
cardboard as combustible

Office paper

1.7 PAPER OFFICE

Office paper is checked, sorted and baled at a paper recycling facility. Thereafter the bales are transported to a paper mill where they are used as raw material in paper production.

😊 YES PLEASE

Computer printouts
Copying paper
Brochures
Newspapers
Envelopes
Archival documents

☹️ NO THANKS

Corrugated cardboard
Paper mugs
Paper plates
Hard binders

1.8 PAPER PACKAGING MATERIAL

All kinds of paper packaging materials. The material is sorted and baled at a paper recycling facility. Thereafter the bales are transported to mills for the production of new paper material

😊 YES PLEASE

Paper packaging materials

☹️ NO THANKS

Corrugated cardboard packaging contains waste from groceries, paints, oils or other contaminants.

Wax-coated corrugated cardboard

Plasticised paper materials as combustible

Office paper

2.1 ABSORBENTS AND OILY SOLIDS

Absorbents are used in decontamination or cleaning up oil spills, e.g. Absorbent, sawdust and drying cloths.

The absorbents are placed in approved packaging. The material is destroyed or recycled as energy through incineration.

Note: No liquids may be placed in the packaging.

☺ YES PLEASE

Oil-contaminated absorbents
Oil-contaminated drying cloths
Used Absorbent
Oil-absorbent pads
Cloths with paint waste
Oil filters

☹ NO THANKS

Waste oil
Liquid substances
Incendiary chemicals

2.2 AEROSOLS (SPRAYCANS)

Used spraycans to be collected in aproved containers

The waste is transported to recipient for Destruction.

☺ YES PLEASE

☹ NO THANKS

Spraycans with paint

Spraycans with lubricant

Waste oil

Oily solids

2.3 ELECTRONICS WASTE

Electronics waste can contain substances such as PCB, PVC or mercury, which are hazardous to our environment.

Stena Technoworld conducts responsible recycling by decontaminating, dismantling and sorting into recyclable and environmentally hazardous by-products in accordance with applicable legislation.

Electronics waste is placed in special transport cages for subsequent transport to Stena Technoworld.

😊 YES PLEASE

Desktop & laptops computers
Mobile phones
Displays
Hard drives
Printers & electric typewriters
Electrical kitchen appliances
TVs, VCRs, DVD players, modems, etc.
Gaming consoles
Cameras
Phones and accessories
Audio equipment
Toys – electrical
Tools – electrical
Lights

😞 NO THANKS

Fluorescent tubes
Light bulbs
Electric motors
Button cell batteries

2.4 FLUORESCENT TUBES

All types of fluorescent tubes, >60 cm, are placed in the designated packaging.

Handle fluorescent tubes with care so that no mercury is released and so that cutting injuries are avoided. Fluorescent tubes are transported to a facility for recycling.

Fluorescent tubes are gathered and transported in approved packaging.

😊 YES PLEASE

Fluorescent tubes >60 cm

☹️ NO THANKS

Street lighting lamps

Low-energy lamps

Light bulbs

Neon tubes

2.5 FIREWORKS, WARNING FLARES AND DISTRESS SIGNAL ROCKETS

Fireworks, warning flares and distress signal rockets contain highly flammable materials and must be correctly processed and placed in approved packaging.

Hazardous waste is transported for destruction.

☺ YES PLEASE

☹ NO THANKS

Warning flares

Distress signal rockets

Line throwing units

Smoke flares

Fireworks

Ammunition

Explosive substances

Weapons

2.6 LEAD-ACID BATTERIES

Automotive batteries are placed in approved plastic Swedex containers for transport to Stena Recycling's facility for temporary storage.

Forklift batteries are placed on pallets and strapped for subsequent transport to Stena Recycling's facility for temporary storage.

Stationary batteries are handled as automotive batteries.

Battery materials are recycled and the lead is removed. Acids and other hazardous substances are separated and processed for environmentally friendly destruction. Are to be considered as hazardous goods.

😊 YES PLEASE

Automotive batteries

Forklift batteries

Stationary batteries

☹️ NO THANKS

Spray cans

Small batteries

NiCd batteries

NiFe batteries

Other types of rechargeable batteries

2.7 LIGHT BULBS <60 cm

All types of light bulbs, <60 cm, are placed in the designated packaging.

Handle light bulbs with care so that no mercury is released and so that cutting injuries are avoided. Light bulbs are transported to a facility for recycling.

Light bulbs <60 cm are gathered and transported in approved packaging.

☺ YES PLEASE

☹ NO THANKS

All types of light bulbs <60 cm

Fluorescent tubes >60 cm
Neon tubes

2.8 OTHER CHEMICALS

Small chemicals are placed in designated and approved packaging per the sorting instruction.

Stena Recycling provides sorting assistance. Please contact your sales representative for more information.

😊 YES PLEASE

☹️ NO THANKS

Chemicals that are not covered in this handbook

2.9 PAINT WASTE

Paint, lacquer and glue waste in cans are placed in designated, approved packaging and transport to facilities for energy extraction.

😊 YES PLEASE

Paint waste
Solvents
Lacquer and glue waste
Grease waste
Empty, non-cleaned consumer packaging

☹️ NO THANKS

Waste oil
Emulsion
Light bulbs
Liquids
Acids
Bases
Reactive chemicals

2.10 PHARMACEUTICALS

Pharmaceuticals are placed in designated and approved packaging and transported to a facility for destruction.

😊 YES PLEASE

All types of pharmaceuticals

☹️ NO THANKS

Mercury thermometers

Amalgam

Human biological waste

Corrosive/pricking waste

2.11 SMALL BATTERIES

Batteries can contain the toxic heavy metals cadmium, mercury and lead. To prevent these substance from coming out into the environment it is important that both conventional and echargeable batteries are properly disposed of.

Batteries >3 kg are placed in designated and approved packaging.

The batteries are transported to a facility for recycling.

😊 YES PLEASE

Button cell batteries
Manganese batteries
Alkaline batteries
Rechargeable batteries
Integrated batteries

☹️ NO THANKS

Spray cans
Batteries >3kg
Automotive batteries
Lithium batteries

2.12 WASTE OIL

Waste oil is placed in designated and approved packaging.

Waste oil is transported to a facility for energy or material recycling.

😊 YES PLEASE

Waste oil

Hydraulic oil

☹️ NO THANKS

Solvents

Paint waste

Emulsion

Lubricating oil
